Announcement

Job Description:
A full-time position is available for a research assistant with an interest in the Neuroscience, Psychology or Economics of Decision-Making at NYU’s Center for Neural Science.

This position starts at the entry-level in a large federally funded laboratory with a mixture of research and research related duties. We offer an exciting environment with opportunities for development and growth and are looking for a highly motivated and detail-oriented person with the ability to take on new challenges.

Key Duties and Position Responsibilities:

General lab: Coordinate grant proposal submissions, supervise lab technician, oversee general maintenance of the lab, collaborate with Principal Investigator to develop research protocols, ensure the lab is safe and in compliance with regulations, learn and perform laboratory procedures and keep stocked inventory of lab supplies.

Research: Assist graduate students and post-doctoral fellows with a range of research projects by conducting experiment set-up and recruiting and running subjects.

Minimum Qualifications:
Applicants must have the ability to commit to this position for at least two years.

A B.A. or B.S. in Neuroscience, Psychology, Economics or a related discipline is required.

Must have strong time management and organizational skills.

Must be able to manage competing priorities with close attention to details.

Excellent interpersonal, written, and oral communication skills required.

Light experience with HTML/web design is highly desired.

Experience in a laboratory setting desirable.

To Apply:
Please e-mail a CV, a cover letter detailing a brief description of research experience and interests, and contact information for 1-3 references to jr3327@nyu.edu

NYU is an equal opportunity employer
